Hello Vice-Mayor Devereux,

I hope that this City Council will be responsive to the very many of us in Cambridge who are involved in the human rights struggle, and will take the ethical step of changing its procurement policy on HP Enterprise and HP Incorporated products. In so doing you will be acting in accordance with one of your 2018 guiding principles:

“We take careful steps now to leave a better world for the generations to come."

I look forward to the discussion on this matter next week.

With best wishes,

Nancy Murray
